

Treasure Hunt

Ruby organized a treasure hunt for the kids participating in diving activities at a summer camp.

Here are the objects placed at the bottom of the lake:

Participants had to dive into the lake **to find and bring back** the objects located along the route indicated by the following Cartesian coordinates.

Coordinates of the route they had to follow, in order:

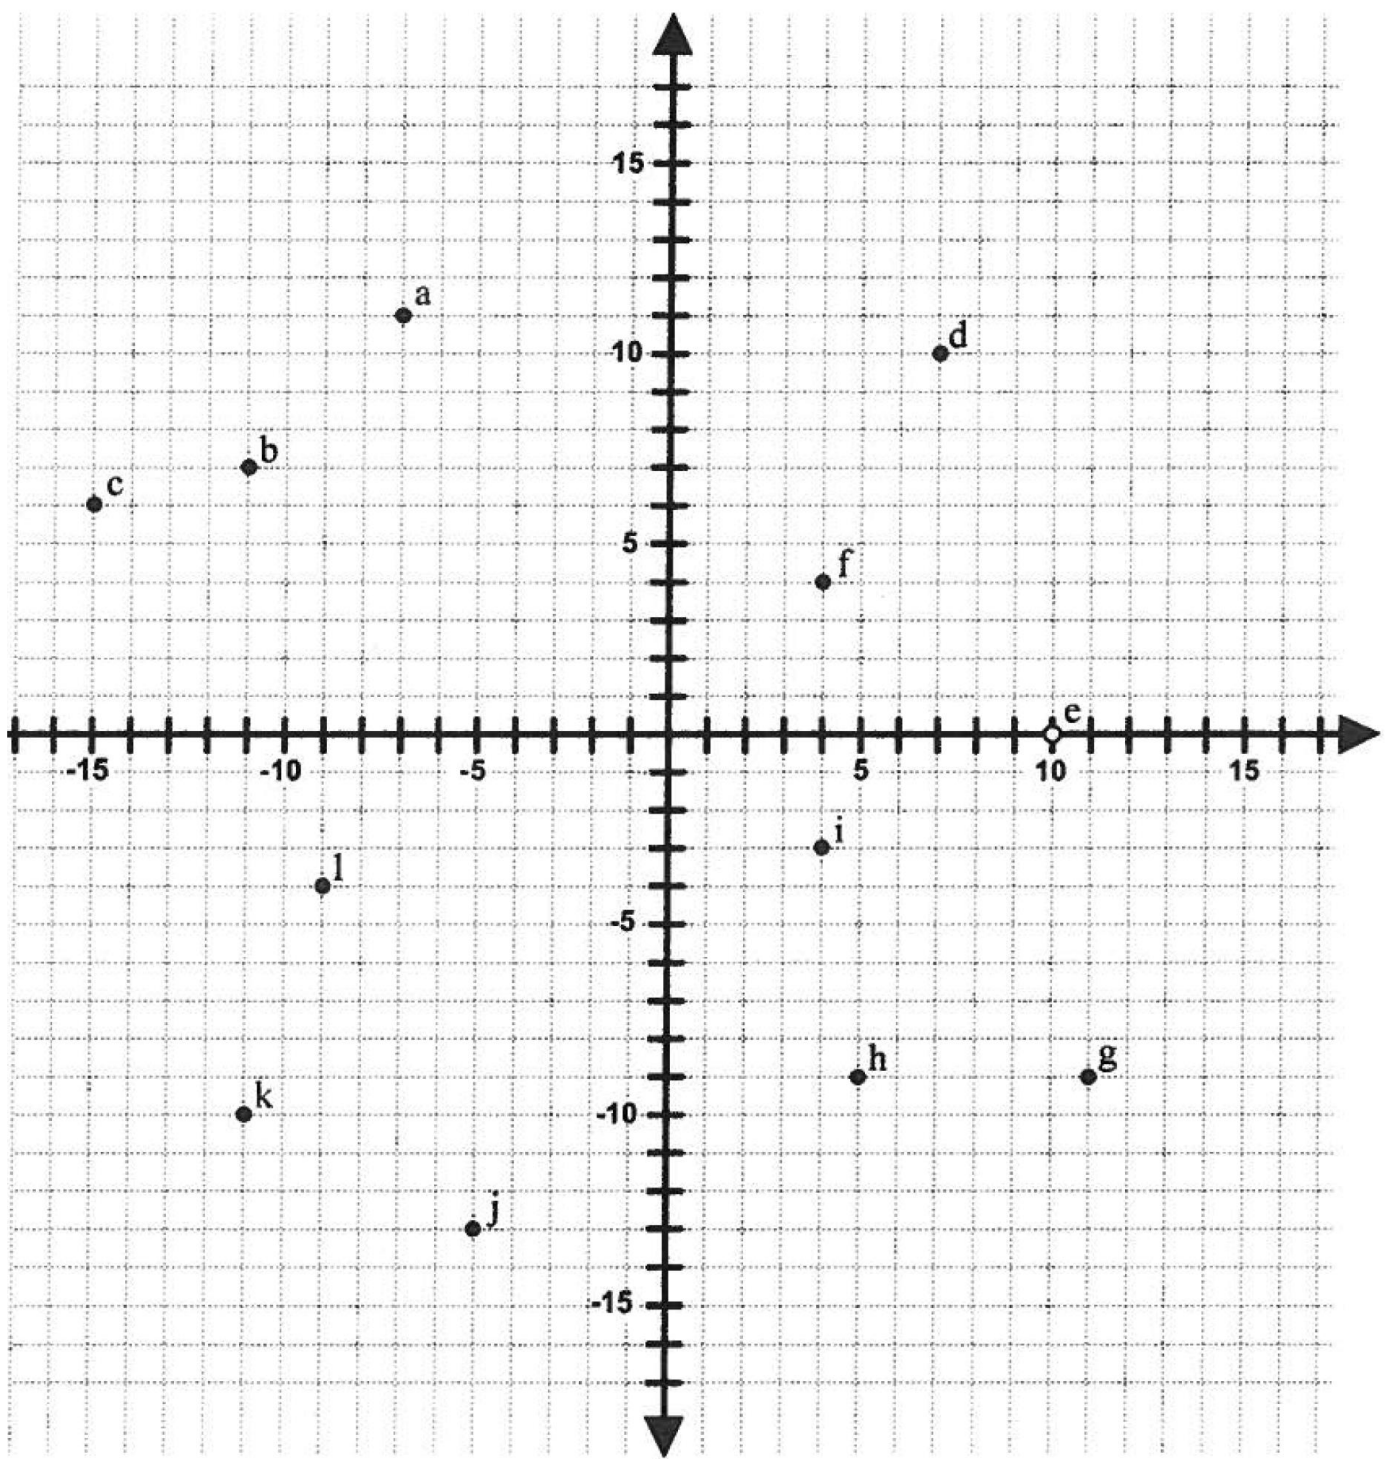

(-15, 15) (3, 6) (11, 14) (15, 6) (8, -3) (13, -13) (1, -10) (-5, -16) (-15, -6) (-8, 1) (-15, 15)

The divers started from a boat situated at (-15, 15).

Indicate the boat's position and draw the route the divers followed during the treasure hunt.

Write down the objects they brought back and the coordinates of the locations where they were found.

The Cartesian plane can be drawn on grid paper and then completed.
Send the completed grid to tirwin@nfsb.qc.ca.

| Object (letter) | Coordinates | Object (letter) | Coordinates |
